

ifmaKC Service Directory Coming Soon!!

Service Directory Application

Good Afternoon ifmaKC Associates!

We have been looking at doing an ifmaKC Service Directory for quite some time and have finally been able to begin to get it implemented!

As a member of a facilities management team, I am really excited about this! There have been many times that I have needed a good or service and wanted to check with members of ifmaKC before looking in the yellow pages, but sorting through the member directory to see who does what was too time consuming.

Soon the application to be included in the directory will be posted on the website, and a link to it will be sent out, too. It will have some character length limitations, but photos of the members and company logo will be displayed. The service directory will be in PDF format, and, initially, be available to members only through our website. Inclusion in the service directory is open to both associate and professional members. For professional members, if your employer provides goods or services that our members may benefit from, we would love for your company to be included.

When filling out the form, we would like the member's name & info, and in the company section, include the contact information for requesting services. (i.e. you're the facilities manager for a local florist and ifmaKC members could purchase floral arrangements from your company, although not from you.) If your company has multiple members in ifmaKC, there is space for a 2nd member to be listed, too. If required, up to 3 broad service areas can be selected, and key words can be included in the company info so that the pdf can be searched (limit of 700 characters in the company info). You can identify your goods or service's CSI division, too.

We will have you email the completed form and your high-resolution personal photo and company logo to the email address listed in the application, which then several volunteers in the chapter will format them into the directory pages, and then publish onto the service directory section of the website.

On behalf of the ifmaKC Communication & Membership Committees, we are excited about this new feature of our chapter!

Thanks,
Luke Winter, Co-Chair ifmaKC Communications Committee
FMO Crew Leader Maintenance & Repairs – City of Overland Park.
